Experience

Portal Instruments

Cambridge, MA / my apartment

Software Engineering Co-op

Jul '20 - Jan '21

- Implemented error handling to prevent unwanted i2c communication shutdowns caused by a falsely detected Electrostatic Discharge event
- Upgraded device logging to correctly parse time-series data and record the device's hardware information
- Improved test coverage using GoogleTest and Behave

New Age Micro

Mansfield, Ma

Software Engineering Co-op

Jul '19 - Dec '19

- Built a long term test setup to stress test a communication protocol between programmable logic controllers
- Designed software to exchange continuously generated random numbers between devices, verify their correctness, and log any error occurrences. This software ran successfully for several weeks to demonstrate the protocol's reliability.
- Upgraded outdated test protocols and removed unnecessary tests to greatly reduce the amount of time needed for a full regression test

Northeastern University

Boston, MA

Engineering Co-op

Sep '18 - May '19

- Assisted with fabrication of microscopic magnetic resonators
- Evaluated performance using a MATLAB script and measuring probe
